

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	
Team ID	
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Submission	Submit request via Employee Center catalog form Select laptop model, business justification, and urgency Attach supporting documents (manager pre-approval, if any)
FR-2	Duplicate Request Validation	System checks for existing open requests for the employee Blocks duplicate submission and alerts the employee
FR-3	Manager Approval	Manager receives approval task in Approval Inbox Manager approves or rejects with comments Approval status updates the request record in real time
FR-4	Notification & Fulfillment	Email confirmation sent to employee on decision IT Admin fulfillment task auto-created on approval Asset is assigned and tracked against the employee

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, guided catalog form; mobile-responsive Service Portal UI for request and status tracking
NFR-2	Security	Role-Based ACLs restrict record access; data encrypted in transit (TLS 1.2+); full audit trail of approvals
NFR-3	Reliability	Business Rule duplicate-check and Flow error-handling ensure the request never gets stuck in an inconsistent state
NFR-4	Performance	Approval notifications and state updates complete within 2-3 seconds of a decision being made
NFR-5	Availability	99.8% uptime aligned with the ServiceNow platform SLA, backed by distributed data centers
NFR-6	Scalability	Supports concurrent requests across multiple departments without degradation in response time
