

Acceptance Testing UAT Execution & Report Submission

Date	
Team ID	
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the ServiceNow-Based Employee Laptop Request Application at the time of release to User Acceptance Testing (UAT).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved. Severity 1 = Critical (blocks core functionality), Severity 2 = High, Severity 3 = Medium, Severity 4 = Low/Cosmetic. All three defects found during development (missing Approval relationship, inactive approval flow, and role visibility in the scoped application) were fixed prior to this UAT cycle.

Resolution	Sev 1	Sev 2	Sev 3	Sev 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	1	1	1	0	3
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	1	1	1	0	3

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and not yet tested, grouped by functional area of the application.

Section	Total	Not Tested	Fail	Pass
Request Submission (Record Producer)	4	0	0	4
Approval Workflow (Flow Designer)	4	0	0	4
Notifications (Email)	2	0	0	2
Business Rule Validation (Duplicate Block)	2	2	0	0
Access Control (Roles / ACLs)	3	2	0	1
Platform Configuration (Flow / Update Set)	4	1	0	3
Totals	19	5	0	14

Open Items: The Business Rule Validation (duplicate-request block) and two Access Control checks (manager read-only enforcement, live edit-attempt) remain “Not Tested” in this cycle and are recommended for execution before final release sign-off. No failed test cases were recorded.
